Coaching in education: a professional development process in formation

Rachel Lofthouse

ABSTRACT

Coaching has been evolving as a form of professional development for teachers and school leaders for several decades, and now exists in many forms. This study focused on the work of six coaches in England, using an adapted focus group approach to discover how they explained and conceptualised the value of their practices. As the coaches’ conversations with each other emerged details of the nature of their work, and their reflections on it, were elicited which were analysed thematically while also paying due attention to individual narratives. Although coaching is not easily defined this study demonstrates the significance of relationships and dialogue in coaching and the structures and protocols that support that. It suggests that coaching is suited to helping individuals dealing with authentic challenges, professional interests and dilemmas experienced in complex educational settings, while also acting as a counterweight to some of the consequences of performativity. The study also suggests that coaching may be a valuable means to deploy the expertise of experienced professionals to support an education system exposed to problems of retention of both teachers and school leaders.

Using ecological analysis to discuss curriculum

**INPUTS**
Who are the learners? What do you know about them that should influence your planning?
What is framing the curriculum; what are the opportunities and constraints?
How confident are you about your own knowledge base and relevant experience?

**EXPERIENCE**
How did learners engage with the curriculum?
What was your role as the teacher?
How were the episodes of learning connected within and between lessons?
How was this related to the inputs, and what occurred that was unexpected?

**OUTCOMES**
What evidence was there of learning? How is this recognised?
What did you learn about pupils / your subject / yourself?
What might be the legacy of this curriculum? How can this be enabled and enriched?
Theory of Practice Architecture, Stephen Kemmis

**SEMANTIC ‘SPACE’**
What is said, nature of the language, its meaning, intention and comprehensibility, its formality or informality, how it is received and responded to

**SOCIAL ‘SPACE’**
How individuals connect and relate to one another, what roles they take, formal and informal relationships, the significance of power, trust and solidarity, how individuals feel in the social space

**PHYSICAL / TEMPORAL ‘SPACE’**
What activities occur, productiveness of actions, how the space is configured and set up, how resources are deployed, how individuals undertake their activities

- ‘sayings’
- ‘doings’
- ‘relatings’
Exploring research questions

Exploring research questions

Potential to be transformative form of CPD (Kennedy, 2014)

Links to collaborative professionalism (Hargreaves & O’Connor, 2017)

Coaching can build teacher collective efficacy (Donohoo, 2017)

Coaching can be practiced as a counter-balance to performativity (Lofthouse & Leat, 2013)

Links to ecological agency (Priestley et al, 2015)
Final discussion...

What research questions emerge about approaches to professional learning & curriculum in action?
