Title given in book of abstracts as "Operationalising professional expertise: effective injury prevention by a multidisciplinary team working in professional rugby".

The aim of the Leeds Beckett Repository is to provide open access to our research, as required by funder policies and permitted by publishers and copyright law.

The Leeds Beckett repository holds a wide range of publications, each of which has been checked for copyright and the relevant embargo period has been applied by the Research Services team.

We operate on a standard take-down policy. If you are the author or publisher of an output and you would like it removed from the repository, please contact us and we will investigate on a case-by-case basis.

Each thesis in the repository has been cleared where necessary by the author for third party copyright. If you would like a thesis to be removed from the repository or believe there is an issue with copyright, please contact us on openaccess@leedsbeckett.ac.uk and we will investigate on a case-by-case basis.
Effective working processes employed by a multidisciplinary team to reduce injury

Dr. Jason Tee & Dr. Fieke Rongen

@JasonCTee  @FiekeRongen
JasonT@dut.ac.za  f.rongen@leedsbeckett.ac.uk
Sports injury is complex and multi-factorial

MDT’s are best equipped with the knowledge and skills needed to reduce injury.
What’s the problem with MDT’s?

- Differences of opinion
- Lack of support
- Availability
- No data
- Competition for coach attention
- Conflict
- Bad data
- Workload
- Lack of resource
Rationale

Research investigating the processes and practices of MDT’s is limited, particularly within high performance team sport environments.

Aim

Investigate the contributory contextual factors and working practices of a MDT that has been demonstrably effective.
Finding the effective MDT

58% reduction in injury burden following the establishment of a new MDT!

[Image of bar chart showing comparison between League Average, Old MDT, and New MDT for 2017 and 2018, with reduction marked by asterisk]
Methods

Participants

The MDT
- Head Coach
- Assistant Coach
- S&C Coach
- Physiotherapist
- Sport Scientist

Procedures

Individual semi-structured interviews

(1) the injury prevention process within the club,
(2) the role of each member of the MDT in relation to injury prevention,
(3) whether and how injury prevention could be optimized

Data analysis

Inductive thematic analysis according to the methods of Braun, Clark and Wheat (2016)

Experienced qualitative researcher acted as a critical friend throughout the analysis process

Results

Shared Values
A shared value system provided a deep rooted understanding of the overarching principles that the group should uphold in their daily practice

1. Do what is best for the players, not for the team
2. Injury prevention is everyone’s responsibility
3. Everyone’s expertise is valued
4. There is always room to improve

“It isn’t the Physio’s sole responsibility to prevent injury. It’s our responsibility as a Department to prevent injury and we all tip into that.”

Assistant coach

“For a team to be successful all members of staff have to communicate well and have a good relationship. I genuinely want what’s best for people. I’m never going to overrule someone.”

Head Coach
Shared Values
A shared value system provided a deep rooted understanding of the overarching principles that the group should uphold in their daily practice.

1. Do what is best for the players, not for the team
2. Injury prevention is everyone's responsibility
3. Everyone's expertise is valued
4. There is always room to improve
Results

Expertise

- Excellence in areas of professional expertise
- Context specific expertise
- Skill in building and maintaining interpersonal relationships

Take home message

The main finding of this research is that while effective operational procedures are undoubtedly important, the effectiveness of these procedures is built on a foundation of shared values and high levels of professional and interpersonal expertise.

“Certainly the academy structure is the best I’ve been in. I wouldn’t change anything to be honest. I think every member of the team, we’re working towards the same goals and I think that’s key, everything is really well streamlined. I think it works really well.”

Physiotherapist
