The aim of the Leeds Beckett Repository is to provide open access to our research, as required by funder policies and permitted by publishers and copyright law.

The Leeds Beckett repository holds a wide range of publications, each of which has been checked for copyright and the relevant embargo period has been applied by the Research Services team.

We operate on a standard take-down policy. If you are the author or publisher of an output and you would like it removed from the repository, please [contact us](#) and we will investigate on a case-by-case basis.

Each thesis in the repository has been cleared where necessary by the author for third party copyright. If you would like a thesis to be removed from the repository or believe there is an issue with copyright, please contact us on [openaccess@leedsbeckett.ac.uk](mailto:openaccess@leedsbeckett.ac.uk) and we will investigate on a case-by-case basis.

# Trans identities: the basics

**"Sex"** refers to the biological and physiological characteristics that define men and women.

**"Gender"** refers to the socially constructed roles, behaviours, activities, and attributes that a given society considers appropriate for men and women.

# Trans identities: the basics

- We are **assigned** male or female at birth – not “born male” or “born female”
- These are **binary genders**: we are generally taught that someone can only be one or the other

# Being a trans library user

- Updating personal details: where do we hold data that relates to a customer's gender?
  - think beyond name and gender
  - title: do you offer gender-neutral options (Mx)?
  - notes on borrower records/old documents
- Think **widely** and **comprehensively** to protect confidentiality

# Points for reflection

- What untapped expertise might your frontline staff members have?
  - different user groups
  - different work environments
- How can you create an environment where they are **willing** and **able** to use that expertise?
- How might you use what you've learned today to support your trans customers?
