The aim of the Leeds Beckett Repository is to provide open access to our research, as required by funder policies and permitted by publishers and copyright law.

The Leeds Beckett repository holds a wide range of publications, each of which has been checked for copyright and the relevant embargo period has been applied by the Research Services team.

We operate on a standard take-down policy. If you are the author or publisher of an output and you would like it removed from the repository, please [contact us](#) and we will investigate on a case-by-case basis.

Each thesis in the repository has been cleared where necessary by the author for third party copyright. If you would like a thesis to be removed from the repository or believe there is an issue with copyright, please contact us on openaccess@leedsbeckett.ac.uk and we will investigate on a case-by-case basis.

Health Promotion Partnerships

Background

LEEDS BECKETT

The CommUNITY initiative exists to promote joint working between the university and community organisations

ST GEORGE'S CRYPT

A charity in the city of Leeds working with the homeless, vulnerable and those suffering from addiction

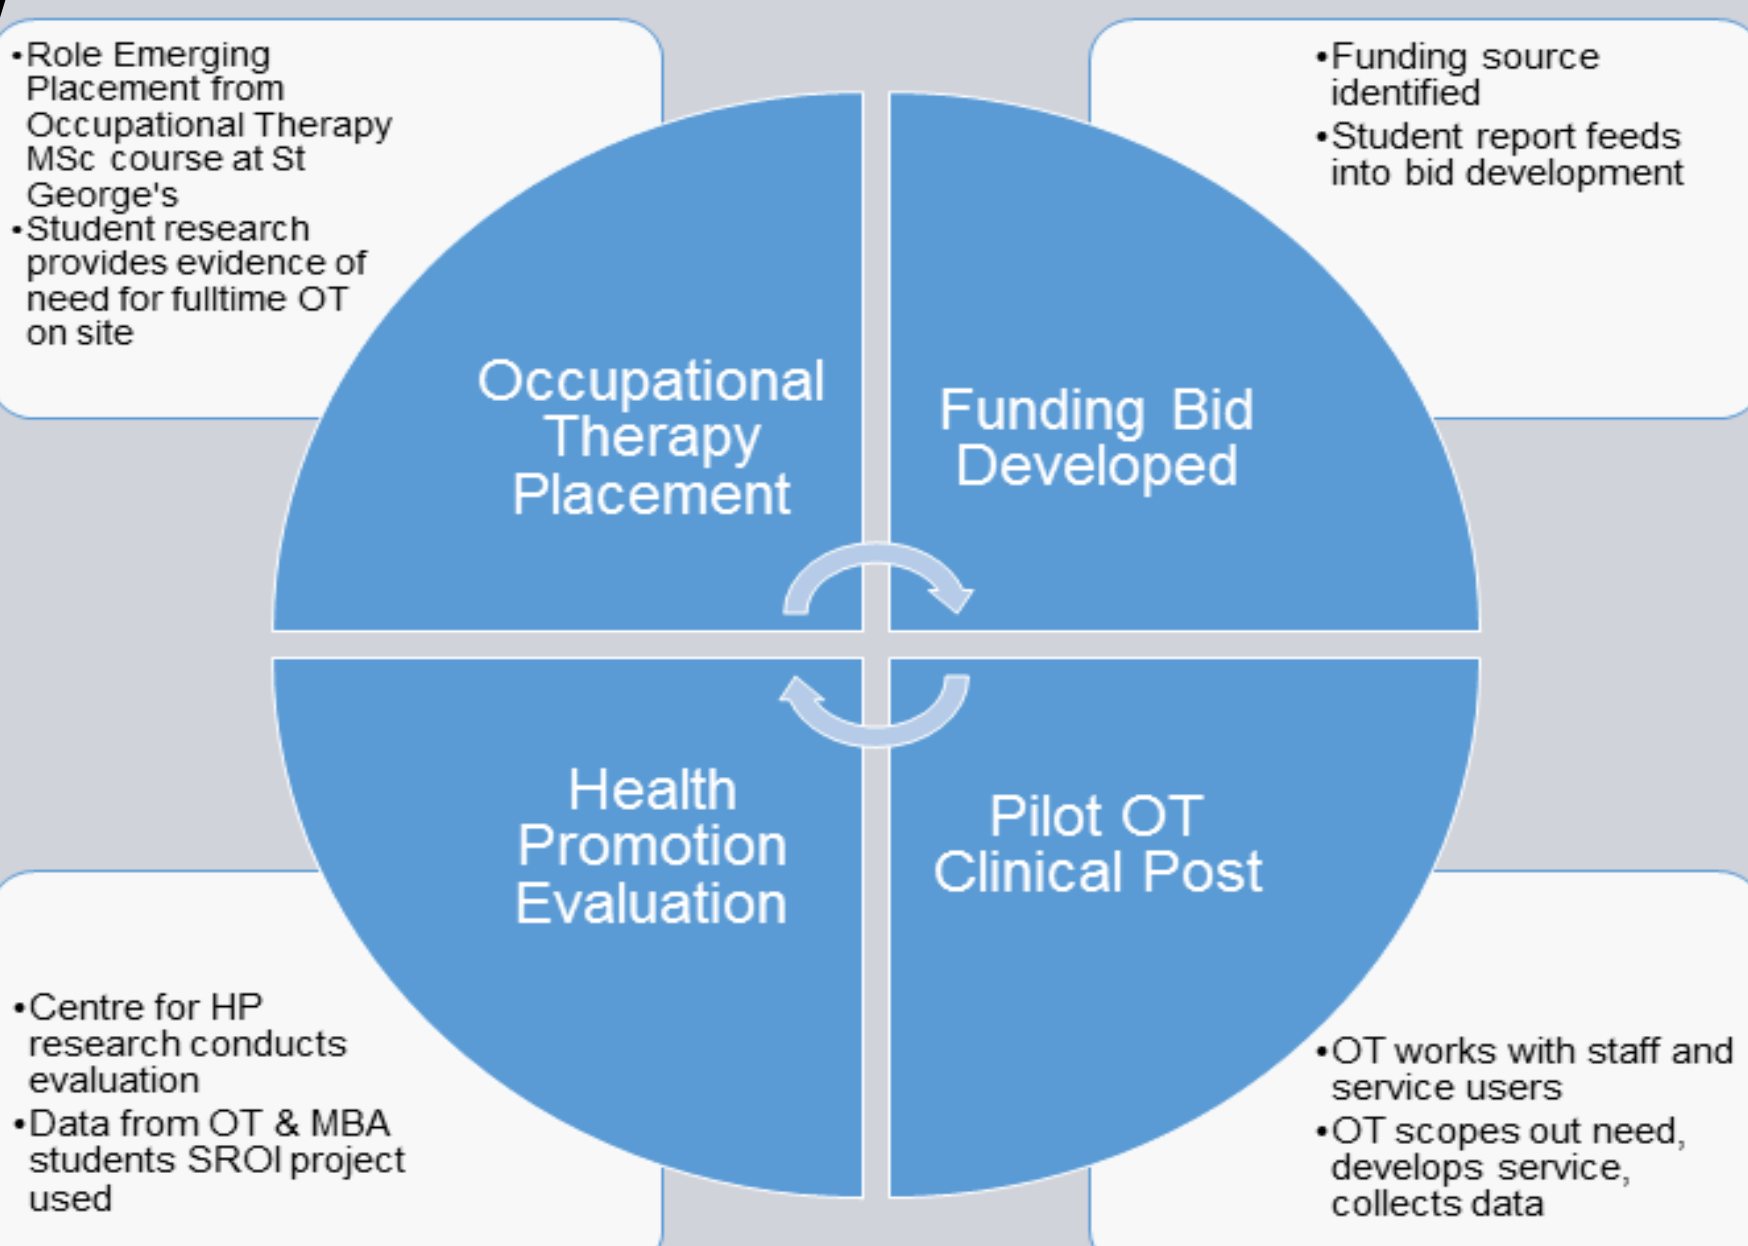

- Communities have a vital role to play in physical & mental health & wellbeing & promoting healthy behaviours¹
- Universities have a wealth of resources and are a significant player in building healthier communities²
- In the current climate of austerity where funding is scarce, universities can support charities to deliver services the local authority can no longer offer
- Our collaborations place emphasis on a community centred approach for health and wellbeing, as social connections & influence on local decisions are major factors in good health³

Activity	Benefit to University	Benefit to Community
Placements (e.g. OT, Physio)	Experience for students Employability	Access to skills, knowledge, latest practice Direct impact on service user health
Knowledge Exchange (e.g. Workshops)	Access to community knowledge Increases student engagement	Specialist training for staff Information for service users e.g. law clinic
Dissertations/ Projects	Real life engaging topic for students Valuable learning experience	Analysis can help develop service Evidence for funding bids e.g. MBA project
Research/bids/evaluations	Access to research areas/ participants	Demonstrate value of their service Recommendations for improvements
Volunteering	Acquiring additional skills	Increased capacity to deliver service

Model

Learning

- Building positive relationships underpins all our work
- Mutual benefit is essential for sustainability
- Academic and community knowledge have to be valued equally
- Partnerships develop organically to meet the needs of the community organisations and university staff/students
- Sharing good practice with other universities and community groups is important for developing the model
- Community campus partnerships need to be embedded in the culture of the university
